RE: HIT-HY 70 Adhesive replaces HIT-HY 150 MAX in masonry applications

To whom it may concern:

Hilti HIT-HY 70 Adhesive Anchoring system will replace our existing HIT-HY 150 MAX Adhesive Anchoring systems for masonry applications.

The Hilti HIT-HY 70 Adhesive Anchoring system is a fast cure adhesive with high load performance. In the majority of masonry anchoring applications, the published load values of HIT-HY 70 Adhesive are equivalent or higher compared to HIT-HY 150 MAX.

ICC-ES reports for unreinforced masonry (ESR-3342), as well as hollow and fully-grouted concrete masonry walls and hollow brick masonry walls, (ESR-2682) are available for HIT-HY 70.

Please refer to the HIT-HY 70 Technical Supplement for additional technical information.

If you have any questions, please do not hesitate to contact our customer service team at (800) 879-8000.
